ROSS RIVERA: Hi. Ross Rivera. My

20 comments are kind of questions that have  
21 never been answered or investigated about  
22 emergency personnel that might have to --  
23 well, they will go on an accident scene if  
24 there is a spill and if there is exposure.

25 Who is going to take care of the

0017

1 emergency personnel, the fire department,  
2 the EMS, the law enforcement if they are  
3 exposed? And usually signs and symptoms  
4 don't show up until later on in the years.

5 Who's going to evaluate these  
6 people through these years and who's going  
7 to foot the costs that has an impact on  
8 each entity of these departments?

9 And I can see if we were trying to  
10 prove that their illnesses were caused from  
11 the exposure, I can see it being tied up in  
12 litigation and I can see hardship on some  
13 families of emergency personnel. This has  
14 not been addressed either.
